

PREFACE

ICL endeavours to ensure that the information in this document is correct and fairly stated, but does not accept liability for any error or omission.

The development of ICL products and services is continuous and published information may not be up-to-date. Any particular issue of a product may contain part only of the facilities described in this document or may contain facilities not described here. It is important to check the current position with ICL.

Specifications and statements as to performance in this document are ICL estimates intended for general guidance. They may require adjustment in particular circumstances and are therefore not formal offers or undertakings.

Statements in this document are not part of a contract or program product licence save insofar as they are incorporated into a contract or licence by express reference. Issue of this document does not entitle the recipient to access to or use of the products described, and such access or use may be subject to separate contracts or licences.

From 1 October 1976, International Computers Limited has acquired certain of the computer activities previously carried on by the Singer Company.

The products and services now offered by ICL may differ in detail from those formerly offered by your Singer supplier. Readers should therefore consult their local ICL office to confirm the current availability and support status of any products or services referenced in this publication.

The DMF II Programmers' Reference Booklet contains summary information for System Ten. It is intended primarily as a quick and convenient source of reference for programmers and analysts. The first sections outline the fundamental components of the System Ten hardware and the final sections list the commands associated with the auxiliary support programs Assembler II, Link Editor, DMF II SORT, Tester II and Text Editor, and the system support programs MAINT and SETIPL.

For detailed information concerning the above, reference should be made to the following System Ten publications:

<i>Assembler II Reference</i>	(Edition C, TP7502)
<i>DMF II Programmers' Reference</i>	(Edition C, TP7539)
<i>DMF II SORT</i>	(Edition 3, TP7596)
<i>DMF II System Support Programs</i>	(Edition 4, TP7563)
<i>Link Editor</i>	(Edition 2, TP7597)
<i>Model 22 Processor</i>	(Edition 1, TP7529)
<i>Tester II</i>	(Edition 1, TP7505)
<i>Text Editor</i>	(Edition A, TP7509)

Purpose of new edition

To update the manual for System Ten Software Release 05.

7700/0
